## **Los Angeles Wakes to 4.4 Rumbler** *spcaLA reminds: prepare for family and pets*

**Los Angeles, CA** – Most of Los Angeles received a 6:25 a.m. wake-up call by a 4.4 earthquake centered about 6 miles north-northwest of Westwood, according to the United States Geological Survey. Society for the Prevention of Cruelty to Animals Los Angeles (spcaLA) reminds all Angelinos to include their pets in their disaster preparedness plans.

### **Prepare for your pets' safety**

- Microchip your dogs and cats, and ensure they are wearing current ID tags at all times.
- Familiarize yourself with pet CPR, resuscitation, and general first aid. If roads are blocked, emergency services may not be available.
- Keep your pets current on vaccines. During a disaster, your pet may get lost or may be housed in a shelter with other animals, thereby potentially being exposed to infectious diseases.
- Entrust a neighbor or friend to get your pets to safety, in case you are at work when a disaster strikes, and make a back-up plan to board your animal during a disaster (veterinarian, boarding facility, etc.).
- Display a [Pet Alert](#) sign in doors and windows, so responders know there are animals on the premises.

### **Make a kit**

In addition to the food, water and supplies you need for the people in your family make sure to include the following items for you pets in your disaster kit.

- Current photos of your pets, copies of vaccination records & veterinarian's contact info
- Collars, leashes & carriers for your pets
- A minimum of three weeks' supply of pet food & bottled water (plus bowls & can openers)
- Treats, toys, blankets & towels
- Pet First Aid Kit (should include: pet first aid book, antiseptic, topical ointment, dressing and any prescribed pet medications)
- Soft muzzle (some government evacuation vehicles/facilities may require for all dogs)
- Waste removal system: disposable baggies for dogs and/or cat litter, scooper & temporary litter box (like a disposable aluminum foil pan) for cats
- [Animal Evacuated](#) sign

### **During the disaster**

- Try to stay calm. If you display anxiety and stress, your pet will detect it. This could trigger aggressive behaviors or a flight response.
- Continuously check pet structures and favorite hiding places for hazardous debris.
- Alert local shelters immediately if your pet becomes lost.
- Display your "Animal Evacuated" sign if you evacuate with your pet, so that emergency teams can respond where assistance is actually needed.

**Since 1877, spcaLA has been the premiere independent, nonprofit animal welfare organization serving Southern California. There is no national SPCA, parent organization, or umbrella group that provides financial support to spcaLA. Donations run programs and services including Cruelty Investigation, Disaster Animal Response Team, Humane Education, and a variety of shelter services.**
